Dear Colleague,

Medicated Home Alcohol Detoxification

Your patient has given you this letter because they would like me to provide a medicated home alcohol detoxification programme for them.

I will do this only if, after a full assessment on my part, I feel it is safe and appropriate to do so.

Should I proceed I will provide all medication, monitoring and support. All treatment is provided in line with NICE clinical guideline 115 (Diagnosis, assessment and management of harmful drinking and alcohol dependence).

I am asking you to let me know if you know of any reason why home alcohol detox may be unsafe.

Thank you in advance for your help.

Yours Faithfully

Mark Jay
